Environmental Education Intern Application

Supplemental Questionnaire

Background Information:

LOTT's new Water Education and Technology (WET) Center will be open to the public in July 2010. The Center will have interactive exhibits that teach visitors about the water cycle, water use, wastewater treatment, reclaimed water, water conservation, careers at LOTT, and Puget Sound stewardship opportunities. Saturday presentations and fun, hands-on activities that expand on exhibit themes will take place in a large classroom connected to the exhibit gallery. During the week, teachers bringing classes to the Center will be able to choose from a menu of education programs to customize their visits.

An informational flyer for the planned WET Center is available online at:

Instructions:

Please attach an unofficial copy of your transcripts and provide your responses to the following questions with your official LOTT Application. Record your name on the upper right hand corner of each attached sheet.

1. How does your major area of study relate to this internship?

2. What skills do you have that would make you successful in this position?

3. Why do you want to be an environmental education intern for LOTT?

4. What experience have you had working with the public? (Include volunteer and work experience.)
